

	Google	Blackboard SafeAssign	Ebsco Databases	Lexis Nexis Database	OhioLINK eBook Center	Electronic Journal Center
Where it searches	Full text of indexed web pages, PDFs and other file types, images, some eBooks.	Full text of submitted Lakeland assignments, unknown list of journals and the web.	Full text articles from periodicals, reports, newspapers, some books, a few primary sources.	Full text articles from newspapers, newswires, transcripts, some blogs, company information and misc. publications.	Full text of OhioLINK eBooks. <u>It's most effective to search each eBook collection separately.</u>	Article titles, journal titles, author names, abstracts. EJC contains articles from scholarly publications.
How to search it <u>Bracket all phrases or sentences with quotes!</u>	<p>Web – Advanced Search Enter unique phrase or whole sentence</p> <p>PDFs 1. Select advanced search 2. Select PDF as the file 3. Enter unique phrase or whole sentence</p> <p>Scholarly books/PDFS 1. Select Scholar from the “more” menu at the top of the page 2. Enter unique phrase or whole sentence 3. Use the Search function in Reader to find keywords/phrases.</p> <p>Books, Images, etc. 1. Select the appropriate search from the menu at the top of the page 2. Enter unique phrase or whole sentence</p>	<p>The directions below are for scanning work not previously set up for SafeAssign.</p> <hr/> <p>1. Select Course Tools in the Control Panel Menu 2. Click on SafeAssign 3. Select Direct Submit 4. Click on the blue button with the white + sign “Submit a paper” 5. Checking either “Submit as Draft” or “Skip Plagiarism” skips scanning the paper for plagiarism. 6. Use “Upload a File” to submit like an attachment or use “Copy/Paste” to paste in a section or a whole document 7. SafeAssign takes a few minutes to return results.</p>	<p>Access Academic Search Complete via the Lakeland Library Homepage under Articles, Etc.</p> <hr/> <p>1. Click on “Choose Databases” at the top of the screen. 2. Check off one or more databases (Academic Search Complete is the most commonly used) 3. Select Boolean/Phrase 4. Check “also search within the full text of the articles” 5. Enter unique phrase or whole sentence</p>	<p>Access Lexis-Nexis via the Lakeland Library Homepage under Articles, Etc.</p> <hr/> <p>1. Link defaults to “Easy Search” 2. Check off the most appropriate sources (major US newspapers, blogs, transcripts, etc.) 3. . Enter unique phrase or whole sentence 4. Select a date range from the drop box 5. Click on item titles to see full text of item with phrase highlighted in red.</p>	<p>Access OhioLINK eBooks via the Lakeland Library Homepage under All E-Resources.</p> <hr/> <p>1. Select Scholarly & Reference or American & English Literature, NetLibrary or Safari Books Online 2. Enter unique phrase or whole sentence 3. These collections highlight a clickable snippet of text containing the phrase 4. For the ACLS Humanities E-Book collection, select the basic search, full text, type in the phrase in quotes. When the results come back, click on “Results Details” to see the snippet of text</p>	<p>Access the EJC through the Lakeland Library Homepage under Articles, Etc.</p> <hr/> <p>1. In the simple search box, enter unique phrase or whole sentence 2. Leave “Any Field” in the adjacent drop box. 3. Click on the titles listed in the results to find the phrase highlighted in yellow.</p>
Limitations	Does not search whole web, all articles, all books, etc. Google only searches items it has in its database.	SafeAssign looks for matches of keywords or phrases and may return “false positives” or miss true cases of plagiarism. It cannot scan PDFs.	Must view each item in results list to see full text unless copied text comes from title.	Must view each item in results list to see full text unless copied text comes from title.	Selecting “All eBook Collections” defaults to Quick Search which <u>does not</u> locate phrase in the book. It just lists books that contain that phrase.	Cannot search the full text of the articles in the database. Use Google Scholar to loop into the EJC.

General Notes:

- No one search tool is accurate and comprehensive, although Google probably covers more sources than the others.
- None of the search tools can access paper mills or other paid sources of plagiarism or hand-typed text from print sources that have not been made electronically available.
- If the suspected text is scholarly, try Google Scholar and the Ebsco databases. In Ebsco, limit results by Academic Journals. OhioLINK databases are linked using FIND IT! Click on FIND IT! and OhioLINK will attempt to find the full text in another database.
- If the suspected text is written for popular audiences, try regular Google, Ebsco and LexisNexis.

Google Scholar (scholar.google.com)

- Click on Scholar Preferences. Type OhioLINK into Library Links, click on Find A Library. Check the box for OhioLINK that appears. Click on Save Preferences.
- Enter text in quotes in scholar's simple search box.
- Results that show "Find it with OLinks" will attempt to locate the full text in an OhioLINK database
